ABOUT ME

I graduated from Osmaniye Korkut Ata University, Department of Computer Engineering in January 2026. Throughout my education, I focused on cybersecurity and SAP integration, and applied what I learned through internships in these fields. I also actively contributed to software development by building an image processing-based graduation project and developing game projects using Unity. I aim to make a strong start to my career as a candidate who is eager to learn, thinks analytically, and can develop projects across different domains.

WORK & INTERNSHIP EXPERIENCE

İŞKUR IT Department — Technical Support Specialist March 2025 – May 2025 (3 Months)

- Assisted with camera installations, port configurations, server checks, and hardware setup operations.
- Set up computers in newly built laboratories and performed system imaging procedures.
- Tested network infrastructure and on-campus connections, resolved issues and provided technical support.

Cyber4 Intelligence | Cybersecurity Intern Ankara (July 2025 – August 2025)

- Set up cybersecurity-focused test environments and conducted hands-on practical studies.
- Gained practical experience in network security and vulnerability analysis using various tools.
- Carried out studies on wireless network security and fundamental attack scenarios.
- Applied scenarios to analyze local network traffic and examine the impact of security vulnerabilities.
- Developed a defensive perspective through OSINT and threat intelligence practices.
- Gained awareness of information security and compliance processes such as ISO 27001 and KVKK.

Negzel Technology | SAP PI/PO Integration Intern Istanbul (August 2025 – September 2025)

- Developed hands-on scenarios on SAP integration solutions and examined data flows between systems.
- Gained practical experience by learning how integration components and processes are designed and managed.
- Worked on data transformation and integration processes across different systems.
- Developed an end-to-end proof-of-concept (PoC) project, implementing an integration scenario from start to finish.
- Observed operational workflows through message flow monitoring and error management processes.

EDUCATION

Osmaniye Korkut Ata University 2021 - 2026

- Computer Engineering

TEKNİK YETENEKLER

- Programming:** C, C++, C#, Python
- Database:** SQL
- Image Processing / ML:** MATLAB, GoogleNet, Deep Learning Toolbox
- Cybersecurity & Networking:** TCP/IP, HTTP/HTTPS, Kali Linux, Nmap, Metasploit, Wireshark, Bettercap
- Integration:** SAP PI/PO, SAP Integration Suite, SLD, ESR, Integration Builder, SOAP, REST, RFC, IDoc, XML, Message Mapping, ICO, Monitoring
- Game Development:** Unity (2D/2.5D)
- AI Tools:** ChatGPT, DALL·E, Midjourney, OpenAI API, Claude, DeepSeek, Google NotebookLM, Claude
- Tools:** Git & GitHub, Visual Studio, Arduino, VMware, VirtualBox, SOAP UI
